

INSTALLATION GUIDE

Designer II Feltonmix™ Wallset

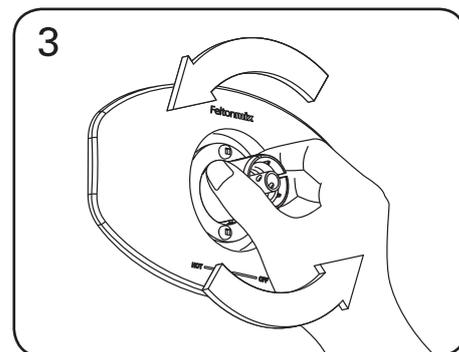

WWSD2/CWSD2

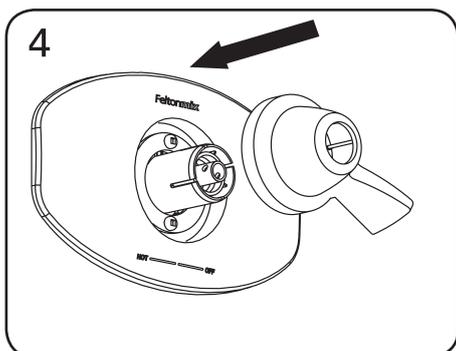

1
Cut an access hole in the wallboard. If fitting the anti-scald washer (optional), see overleaf for further instructions.

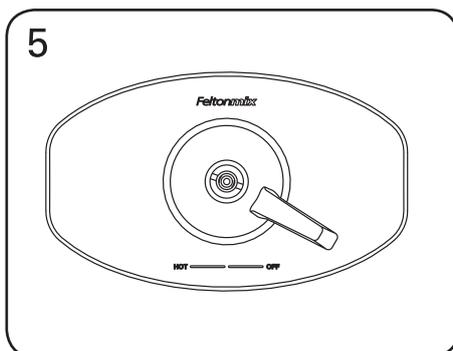

2
Position the wallplate over the valve outlet. Fit the two screws provided through each wallplate slot & into the valve body lugs. Tighten screws alternately - light pressure is sufficient to clamp the wallplate firmly to the wall.

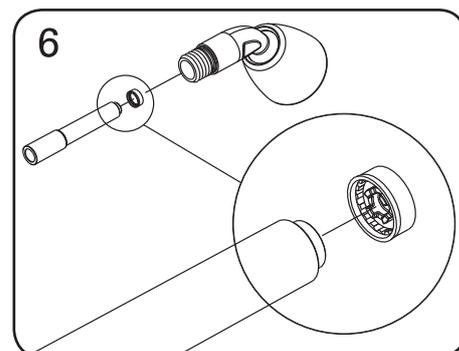

3
Rotate slotted sleeve on valve body (projecting from central hole of wallplate) anti-clockwise.

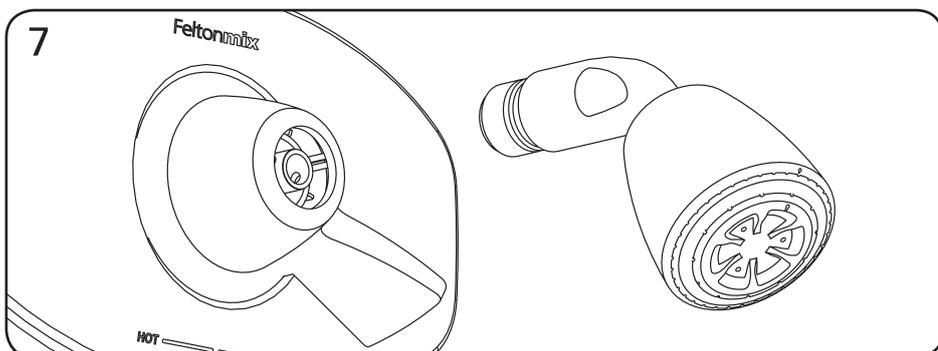

4
Fit handle to sleeve, locating at the 4 o'clock position.

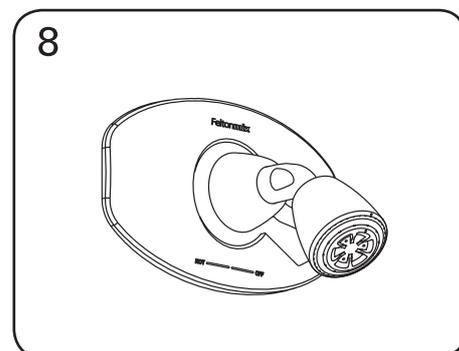

5
Handle should recess into the wallplate and match its contours. Ensure that the handle has about 10mm of engagement.

6
FOR EQUAL HIGH (MAINS) PRESSURE INSTALLATION, fit flow restrictor into showerhead with flow restrictor tool first.

7
Screw showerhead into valve assembly - DO NOT OVERTIGHTEN. If necessary, unscrew showerhead part of a turn to bring it to the correct position. The o-ring seal fitted to the showerhead stem will ensure a watertight seal within 1 1/2 turns from fully tight. Do not use tape or hemp on the thread.

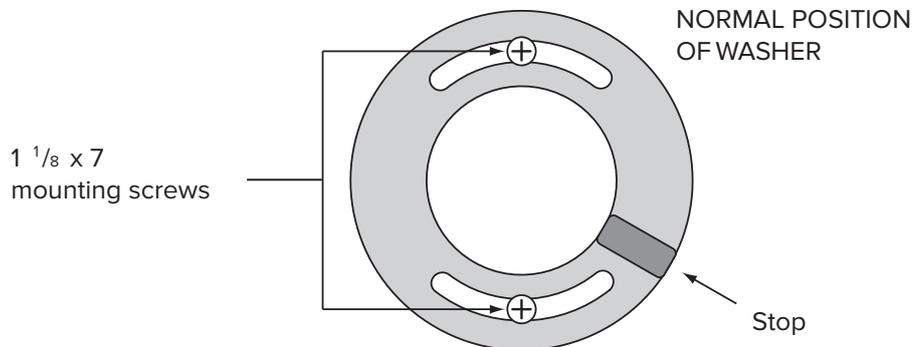

8
Check operation. Handle should swing from right to left from OFF to HOT. Total movement is about 130°.

Feltonmix

The Perfect Shower Every Time

Instruction for fitting Anti-Scald Washer

Refer to installation leaflet for Feltonmix Shower Mixing Valves.

Step 4 should read: Position the wallplate over the valve outlet. Position the anti-scald washer in the recess provided and secure by fitting the two 1 1/8 x 7 screws through the slots of the anti-scald washer and into the valve body lugs.

In normal cases, the fixing screws will be in the mid-slot position as shown above.

Tighten screws alternately until wallplate is firmly clamped to the wall.

Warning: Do NOT overtighten.

To provide a warmer shower, loosen the two fixing screws, rotate the anti-scald washer slightly clockwise and re-fasten.

To provide a cooler shower, loosen the two fixing screws, rotate the anti-scald washer slightly counter-clockwise and re-fasten.
