## A note from the designer:

*"Intuitive usability, geometric styling and fine finishes were the main design drivers that we considered in the development of the Tate range. The use of electronic components in the digital tapware and a 25mm cartridge in the conventional tapware allowed for a compact, sleek profile across the range, resulting in a pure, minimalist aesthetic. A play on negative and positive space during the design process led to the unique indentation and subtle accents on the handles of the products, setting it apart from other market offerings."*

**SENIOR PRODUCT DESIGNER**

## **Tate is a high end, minimalist range offering both conventional and digital mixers.**

The Tate range is presented in a diverse range of exquisite colours and finishes to match your specific interior setting and colour scheme.

Tate Basin Mixer & Tate Sink Mixer

Tate Aerlux™ Shower Rose Brushed Bronze

Tate Digital Wall Mounted Mixer Brushed Gunmetal

Tate Aerlux™ Single Spray Slide Shower Brushed Nickel

## Tate Digital Mixers

Tate digital mixers feature Swiss technology and are backed with full technical support locally by Felton. Felton is well established in the New Zealand plumbing industry and has been leading innovations in water technology for more than 50 years.

Tate digital mixers prevent spikes in water temperatures when other taps in the residence are used. A safer product choice, especially when there are children or the elderly in the household.

Memory settings allow users to select their preferred temperature and flow\* at a touch of the button. Coloured LED lights intuitively indicate temperature changes – blue for cold, orange for warm and red for hot. Other features include programmable maximum run time/temperature, gradual temperature changes and an ambient light setting function.

Unlike conventional mixers and tapware, the temperature/flow controller is separate from the mixer itself, which can be installed in the ceiling or inside the vanity – allowing easy access to the components for diagnostics and servicing.

\*The Tate Digital Wall Mounted Mixer and the Tate Digital Deck Mounted Mixer have a fixed flow rate, i.e. no flow adjustment function. If you would like to control flow rates for these products, simply purchase the Tate Digital Shower Mixer and pair it with the Tate Wall Mounted Spout or Tate Deck Mounted Spout.

## How to use your digital mixer

Tate digital mixers are as simple to use as any regular shower, basin or sink mixer. Designed to ensure safety first, the digital mixer provides LED colour temperature change, three memory settings, gradual temperature change and an ambient light setting function.

### TURNING THE MIXER ON/OFF

Press the mixer once to turn on.  
The mixer will light up. Press the mixer again to turn off.

### ADJUSTING THE TEMPERATURE

Turn the mixer clockwise for hot water and anti-clockwise for cold water.

COLD

WARM

HOT

### ADJUSTING THE FLOW\*

Press, hold and turn the mixer anti-clockwise to decrease flow and clockwise to increase flow.

### KEY FEATURES

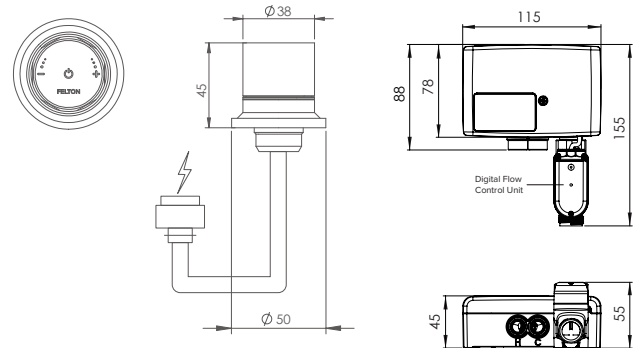

- Thermostatic (shower mixer only)
- Three programmable memory settings for temperature and flow rate\*
- LED lights indicate change in water temperature
- Programmable maximum run time
- Ambient light setting function
- Gradual temperature changes

\*The Tate Digital Wall Mounted Mixer and the Tate Digital Deck Mounted Mixer have a fixed flow rate, i.e. no flow adjustment function. If you would like to control flow rates for these products, simply purchase the Tate Digital Shower Mixer and pair it with the Tate Wall Mounted Spout or Tate Deck Mounted Spout.

- Suitable for mains pressure only (up to 500kPa)
- Digital thermostatic shower mixer
- Available in chrome & PVD finishes
- LED lights indicate change in water temperature
- Three programmable memory settings for temperature and flow rate
- Programmable maximum run time
- Ambient light setting function
- Gradual temperature change
- 5 year warranty

Tate Aerlux™ Handpiece Brushed Nickel

## FITTING THE AERLUX™ JET FOR THE HANDPIECE

## FITTING THE AERLUX™ JET FOR THE SHOWER ROSE

### Caution:

This product is manufactured using stainless steel.  
Care should be taken when using the shower as damage to surroundings may occur if the product is dropped.

## PRODUCT FINISHES

### Care Instructions

#### About PVD finishes:

PVD stands for 'Physical Vapour Deposition' and is the final layer placed on top of standard chrome plating. It is as durable as the chrome plating itself. The PVD process is similar to electroplating, the process used to chrome plate our tapware.

The tap bodies are sealed in an airtight chamber and a vacuum is created. In this vacuum, an inert gas such as nitrogen is used as a medium, and the negatively charged tap bodies attract the positively charged metallic particles. Different finishes are achieved by the different mix of compounds to create metal vapour.

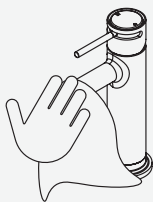

PVD coated products require the same cleaning as any chrome plated products.

#### How to care for your PVD tapware:

All bathroom products require some care and attention from time to time.

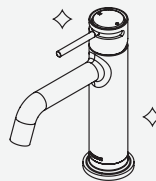

We recommend using a soft microfibre cloth with a solution of warm water and mild detergent to wipe down the mixer once a week to keep your tapware and mixers looking great.

#### General cleaning

##### Clean with a soft microfibre cloth

Use a soft microfibre cloth, warm water and mild detergent such as dish washing liquid to clean your tapware.

Good as new.

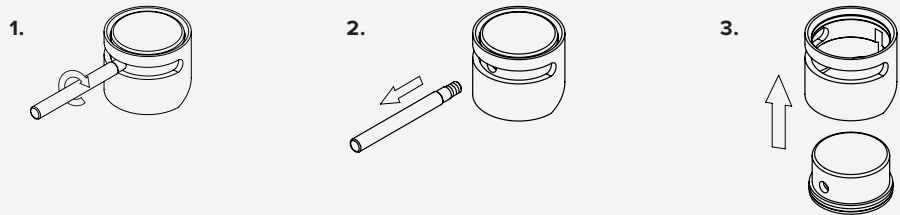

## Cleaning the handle:

The handle can be easily disassembled and cleaned in a few simple steps.

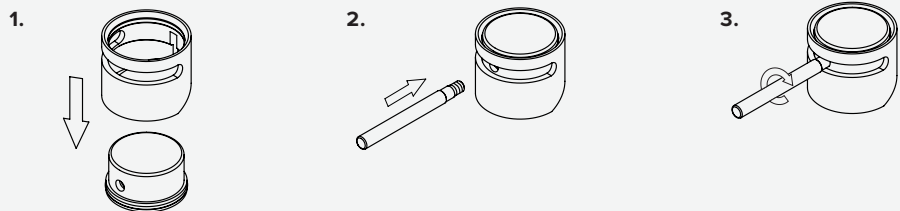

### Disassembling:

Simply unscrew and remove the pin lever handle, wiggle up the sleeve cover and clean the areas required.

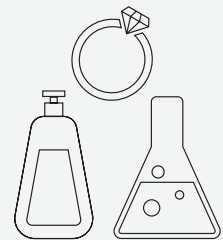

### Assembling:

To reassemble the handle, pop the sleeve cover back over the base. Ensure the pin lever hole is centred in the slot before screwing the pin lever handle in place.

### Things to avoid:

Avoid abrasive cleaning solutions and handling the tapware while wearing/using sharp objects such as rings that could potentially scratch the surface of the tapware.

# HOME STAR

Homestar is designed to be an independent rating tool for assessing the health, efficiency, and sustainability of homes across New Zealand.

Homestar is a holistic tool to rate a homes performance and environmental impact. A Homestar rating recognises a home that has been built at or above the current standards set by the New Zealand building code, dependent on location. The following Tate products can be customised to suit a Homestar assessment, get in touch with us for more information.
